

PRODUCT

The IP55 Cannon Vandal Proof Telephone Handset Cabinet is a single-skinned outdoor cabinet, designed to house Telephone Handsets normally found at unmanned railway level crossings, making them less tempting to unauthorised users. The cabinet, when used in this application is fitted with a Network Rail Number 1* dead-lock, the key to which is restricted to train drivers or the local farmers.

Alternatively the cabinet can be supplied with a Cannon stainless steel swing handle with a key lockable deadlock (not Number 1*) for further applications. The cabinet can be mounted on an optional galvanised hollow post, which can also be used for wiring, or it can be supplied with brackets for wall or pole/post mounting.

The inside of the cabinet can be lined with an optional high performance insulation if condensation is felt to be a potential problem.

For further details please contact Cannon Sales on 01425 632600 or sales@cannontech.co.uk

PRODUCT FEATURES

- IP 55 rating
- Natural ventilation employed for internal cooling
- Single hinged door
- Door secured with drivers Number 1 key type dead locking system or Cannon stainless steel swing handle
- Lock fitted with a weather and dust-proof cover
- Used in Rail side applications for the protection of telephone handsets (with Number 1 key)
- Internal fixings to customers requirements
