Network Rail -approved trackside, platform and operational service enclosures

At this year's Railtex exhibition Cannon Technologies will be exhibiting a range of Network Rail-approved enclosures for both indoor and outdoor that are used extensively within the operation of Network Rails operation including Communications, UPS/battery backup, Level Crossing, Security and PA/Info systems.

Features include up to IP65 sealing, corrosion resistance, single and double wall construction with or without insulation, thermal management, anti-vandalism and graffiti protection. Examples include front and rear access doors along with optional equipment and accessories including thermal solutions, 19" mounting, panel mounting, shelves, remote monitoring and krone connector frame/fibre connection.

In addition Cannon will be demonstrating a range of 19" cabinets suitable for protecting communications, data infrastructure, security, PA and signalling applications.

Also featured will be examples of Polyrack GmbH electronic packaging solutions for the Rail industry including subracks, bespoke plastics solutions for signalling, monitoring, ticketing and train-borne equipment.

ABOUT CANNON TECHNOLOGIES

With a 36-year pedigree, Cannon Technologies provides Electronic Packaging and Data Centre Solutions around the globe - from components, subracks, case, backplanes, chassis and embedded systems to fully integrated cabinet systems. Including turnkey data-centre projects up to TIA 942 Tier 4 to suites of intelligent, environmentally managed infrastructure racks, including cold-aisle cocooning, per-rack access control, video surveillance, intelligent power distribution and UPSs. At a top turnkey level Cannon designs, supplies, integrates and commissions the communications architecture for transportation, military and commercial applications for mission-critical projects. To support Cannons' global customer base the company has subsidiaries in five countries on three continents. To ensure their integrated solutions are optimised to their customer's needs, Cannon partners with leading electronic packaging and embedded systems manufacturers in the industry. Cannon also provides enclosure solutions to electronics companies, from cases to vertical cabinets, as well as precision components such as castings, injections mouldings and front panels. The company has a broad base of proven standard products that can be tailored to individual applications, from initial concept to volume production. Cannon's reliable solutions, flexibility, and design expertise are key reasons why leading electronics companies choose Cannon's Electronic packaging time and again.
