

Cannon Project Details

Kennedy Space Centre; Cape Canaveral, USA

The client's IT team selected Cannon Smart Cab to equip its new Data Centre at Cape Canaveral, USA. Approximately 200 Smart Cabs were shipped from Cannon UK and assembled at site, prior to installation. The 47U 700mm x 800mm enclosures were velvet black in colour and accommodated multi-vendor servers, etc.

The 700mm wide version was chosen by the client to provide sufficient cable management space but save valuable floor space when compared to the usual 800mm wide versions. The enclosures were configured with a range of Cannon Quick Change fan trays, Quick Fit shelving and accessories and cable management.

The Cannon RAFT was used to simplify and accelerate the installation programme.

The project was completed ahead of time, with much positive feedback from installers and client.
